

MPO Essentials Fiber Cables

Our MPO Essentials line of fiber cables feature high-quality, precision-built connectors that ensure secure connections for stable transmission with minimal optical loss.

Increasing Network Demands Require Innovative Solutions

MPO cables were designed to increase network bandwidth, density, & flexibility. They are an excellent solution for creating scalability and future-proofing networks.

FEATURES

- High-quality, precision-built MPO connectors designed to ensure secure connections for stable transmission with minimal optical loss
- Highly durable cable available in OS2 Singlemode as well as OM3 and OM4 Multimode
- Multiple strands packed into a single cable for high-density trunk & backbone applications, creating 40G links, and more
- Made with fire resistant Low Smoke Zero Halogen (LSZH) jacket

High-Density

High-Speed

Scalable

BENEFITS

1 Increase Speed & Bandwidth

MPO fiber cables were designed for high bandwidth transmissions and support high speeds including 40G and 100G data transmission rates.

2 Reduce Cable Congestion

Our MPO Essentials fiber cables pack multiple fiber strands into a single cable, making them perfect for reducing congestion in space-constrained environments.

3 Lifetime Warranty

We stand behind our products. All of our MPO Essentials fiber cables come with an Advance Replacement Lifetime Warranty at no additional cost.
